| HIDRANTE SIGMA FLOW                                              | 13-14 |
| REGISTRO PARA OPERACION DE VALVULA TELESCOPICO (AJUSTABLE)       | 15    |
| TUBERIA AWWA C900                                                | 16    |
| TUBERIA HIERRO DUCTIL                                            | 17    |
| PAGINA INTERACTIVA                                               | 18    |

# *Conexiones Compactas de Junta Mecánica*

## ESPECIFICACIONES TECNICAS CONEXIONES COMPACTAS DE JUNTA MECANICA

|                                           |                                                                                                                |
|-------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| <b>MATERIALES:</b>                        | Hierro Dúctil ASTM A536 Grado 65-45-12                                                                         |
| <b>RANGOS DE PRESION:</b>                 | Presión de trabajo en agua 350 PSI (3" - 24")                                                                  |
| <b>PRUEBAS:</b>                           | De acuerdo con ANSI/AWWA C153/A21.53 y las requeridas por UL y FM                                              |
| <b>DIMENSIONES:</b>                       | De acuerdo con ANSI/AWWA C153/A21.53                                                                           |
| <b>REVESTIMIENTO DE CEMENTO:</b>          | De acuerdo con ANSI / AWWA C104 / A21.4                                                                        |
| <b>RECUBRIMIENTO EXTERIOR E INTERIOR:</b> | Pintura Bituminosa interior y exterior de acuerdo con ANSI / AWWA C104 / A21.4 NSF 61                          |
| <b>EMPAQUES:</b>                          | SBR de acuerdo con ANSI / AWWA C111 / A21.11                                                                   |
| <b>TORNILLOS "T":</b>                     | Acero de alta resistencia y baja aleación con resistente a la corrosión de acuerdo a ANSI / AWWA C111 / A21.11 |
| <b>CERTIFICACIONES:</b>                   | Listado en Underwriters Laboratories (UL) y aprobado por Factory Mutual (FM), NSF 61.                          |
| <b>ESTANDARES:</b>                        | ANSI/AWWA C153/A21.53 para conexiones compactas de Hierro Dúctil de 3" a 48" para agua y otros líquidos.       |

### Materiales

CUERPO : HIERRO DUCTIL ASTM A536 G 45-65-12.

TORNILLOS DE FIJACION: ACERO AISI 4140 RECUBIERTOS TERMICAMENTE CON ZINC

EMPAQUE: SBR

TODOS LOS PESOS MOSTRADOS SON SIN ACCESORIOS

# WEFLO®

  
SIMEX

## *Válvulas, Postes Indicadores, Hidrante de Banqueta*

## VALVULAS COMPUERTA AWWA C515

**Válvula fig. F0211-300  
(Bridada)**

**Válvula fig. F0233-300  
(Junta Mecánica)**

**Válvula fig. F0111-300  
(Bridada Vástago Ascendente)**

### CARACTERISTICAS

- Cumple o excede los requerimientos de ANSI/AWWA C515
- Junta mecánica de acuerdo a ANSI/AWWA C153/A21.53
- Bridas de acuerdo a ASME B16.1 Clase 125
- Presión de Trabajo 300 PSI de (21.09 kg/cm<sup>2</sup>)
- Recubrimiento Epoxico aplicado por Fusión de acuerdo a AWWA C550. Certificado NSF-61 y NSF-372

Poste indicador. F0800 - IP

## POSTE INDICADOR VERTICAL TELESCOPICO PARA VALVULAS DE 4" - 14" Ø

### CARACTERISTICAS

- Indica si la válvula se encuentra en posición OPEN (Abierto) o SHUT (Cerrado)
- Facilita la operación de la válvulas que se encuentran enterradas o son de difícil acceso
- La llave de operación puede fijarse al poste y asegurarse por medio de la abrazadera tipo U con un candado (no incluido)
- Su instalación es sencilla gracias al eje telescópico que se ajusta a la profundidad requerida sin necesidad de recortarlo
- Los indicadores OPEN (Abierto) SHUT (Cerrado) se pueden ajustar sin mayor complicación y hacerlos coincidir perfectamente en la ventanilla.
- Compatible con válvulas de 4" – 14" Ø
- Listadas UL/ULC y aprobadas FM
- Recubierto interior y exterior con epoxy RAL3000

### MATERIALES

## HIDRANTE SIGMA FLOW AWWA C502

### CARACTERISTICAS

- 1 Conexion alimentación rebombeo de 4 ½" rosca NST
- 2 Conexiones de manguera 2 ½" rosca NST
- Válvula principal 5 ¼"

### PRESION DE TRABAJO

- 250 PSI

### UNION A LINEA PRINCIPAL

- Junta Mecánica 6" Ø
- Brida 6" Ø

### PRUEBA HIDROSTATICA

- 500 PSI CORAZA
- 250 PSI ASIENTO

### RECUBRIMIENTO

- Resina epóxica aplicada por fusión de acuerdo AWWA C550.

### LISTADO, APROBADO Y CERTIFICADO

### DIMENSIONES

| A  | B        | C     | D     | E     | Peso       |

## TUBERIA DE HIERRO DUCTIL AWWA

### NORMAS APLICABLES A TUBOS DE HIERRO DUCTIL

DISÑO DE ESPESOR DEL TUBO DE HIERRO DÚCTIL

ANSI/AWWA C150/A21.50

TUBO DE HIERRO DÚCTIL PARA AGUA Y OTROS LÍQUIDOS

ANSI/AWWA C151/A21.51, FEDERAL WWP421D, GRADO C

TUBO DE HIERRO DÚCTIL PARA SERVICIO DE FLUJO POR GRAVEDAD

ANSI/ASTM A746

RECUBRIMIENTOS Y REVESTIMIENTOS ASFALTICO

ANSI/AWWA C151/A21.51

ANSI/AWWA C110/A21.10

ANSI/AWWA C153/A21.53

REVESTIMIENTO DE CEMENTO

ANSI/AWWA C104/A21.4

INSTALACIÓN

ANSI/AWWA C600

### DETALLES Y DIMENSIONES

| Diámetro Nominal | Diámetro Exterior |            | Espesor de la tubería |            | Dimensiones de la campana |            |          |            |
|------------------|-------------------|------------|-----------------------|------------|---------------------------|------------|----------|------------|
|                  |                   |            |                       |            | A                         |            | P        |            |
| Pulgadas         | Pulgadas          | Milímetros | Pulgadas              | Milímetros | Pulgadas                  | Milímetros | Pulgadas | Milímetros |
| 3                | 3.96              | 100.58     | 0.25                  | 6.35       | 5.80                      | 147.32     | 3.00     | 76.20      |
| 4                | 4.80              | 121.92     | 0.25                  | 6.35       | 7.10                      | 180.34     | 3.15     | 80.01      |
| 6                | 6.90              | 175.26     | 0.25                  | 6.35       | 8.63                      | 219.20     | 3.38     | 85.85      |
| 8                | 9.05              | 229.87     | 0.25                  | 6.35       | 10.94                     | 277.88     | 3.69     | 93.73      |
| 10               | 11.10             | 281.94     | 0.26                  | 6.60       | 13.32                     | 338.33     | 3.75     | 95.25      |
| 12               | 13.20             | 335.28     | 0.28                  | 7.11       | 15.06                     | 382.52     | 3.75     | 95.25      |
| 14               | 15.30             | 388.62     | 0.31                  | 7.87       | 17.80                     | 452.12     | 5.00     | 127.00     |
| 16               | 17.40             | 441.96     | 0.34                  | 8.64       | 19.98                     | 507.49     | 5.00     | 127.00     |

### DIMENSIONES Y PESOS ESTANDARES

| Diámetro Nominal | Diámetro Exterior |            | Espesor de la tubería |            | Peso aprox. tramo de tubo | Conexión Tyton Joint |                       |               |
|------------------|-------------------|------------|-----------------------|------------|---------------------------|----------------------|-----------------------|---------------|
|                  |                   |            |                       |            |                           | Campana              | Peso aprox. por tramo | Peso promedio |
| Pulgadas         | Pulgadas          | Milímetros | Pulgadas              | Milímetros | Kg/m                      | kg                   | kg                    | Kg/m          |
| 3                | 3.96              | 100.58     | 0.25                  | 6.35       | 13.24                     | 3.18                 | 83.91                 | 14            |
| 4                | 4.80              | 121.92     | 0.25                  | 6.35       | 16.22                     | 4.08                 | 102.06                | 17            |
| 6                | 6.90              | 175.26     | 0.25                  | 6.35       | 23.81                     | 4.99                 | 136.08                | 25            |
| 8                | 9.05              | 229.87     | 0.25                  | 6.35       | 31.40                     | 7.71                 | 179.17                | 33            |
| 10               | 11.10             | 281.94     | 0.26                  | 6.60       | 40.33                     | 10.89                | 231.33                | 43            |
| 12               | 13.20             | 335.28     | 0.28                  | 7.11       | 15.79                     | 13.15                | 297.10                | 54            |
| 14               | 15.30             | 388.62     | 0.31                  | 7.87       | 51.79                     | 20.41                | 385.55                | 70            |
| 16               | 17.40             | 441.96     | 0.34                  | 8.64       | 83.04                     | 24.49                | 480.81                | 88            |

### INSTRUCCIONES DE MONTAJE

1

Limpie bien la campana con especial atención a la ranura donde encaja el empaque de la junta. Retire cualquier material extraño o exceso de pintura. Limpie la espiga extremo liso biselado y retire los bordes filosos con una lima estándar.

2

Después asegurarse de que esté utilizando el empaque correcto, presionamos un extremo pequeño y lo insertamos en la ranura de campana, soltamos y ajustamos alrededor de la circunferencia.

3

Aplique lubricante a la superficie interior de la campana, asegurándose de que toda la superficie quede cubierta. Así mismo aplicamos lubricante a la parte biselada de la espiga.

4

Guíe la espiga hacia el interior de la campana y mientras mantiene la alineación recta, empuje la espiga hacia la cavidad de la campana. Una vez ensamblada la junta, se puede lograr la deflexión necesaria.
